

THE INTERNATIONAL WORKSHOP

on MANAGEMENT OF COMPLEX WOUNDS

A Novel Approach to Early Wound Closure by ROI-NPT and TopClosure® TRS

December 5-6 2019, Assuta, Tel Aviv, ISRAEL

Main training objectives: Addressing major clinical and global healthcare challenges in wound healing and closure through basic science, clinical applications and hands-on experience

Main Topics:

- Basic science in regulated oxygen-enriched and irrigation negative pressure-assisted wound therapy (ROI-NPT).
- New method of antibiotic delivery to compartmentalized infections
- The roll of stress relaxation and mechanical creep in extreme skin stretching.
- Novel approach for primary closure of large wounds by TRS.
- Advanced early management of infected wounds by ROI-NPT.
- The TopClosure® tension-relief system (TRS) in basic and advanced reconstructive surgery.
- Combined ROI-NPT and TRS as a new gold standard management of infected wounds
- Diabetic foot
- Infected amputations
- Complex soft tissue defects in civilian trauma
- Open abdomen
- Entero-atmospheric fistula
- Deep sternal wound infection
- Deep tissue pressure injury
- Necrotizing fasciitis
- Complex soft tissue defects in combat trauma
- Nursing of complex wounds
- Economic and global healthcare considerations in wound management
